SUMMARY

- A solid, steady batter — strong vs pace, tight technique.
- Plan for pace: bowl **good length in the channel**, get it to **seams away / swings in**.
- They get out most to the **full in the channel** (5.8 dismissals/100).
- Most often out **caught** (69% of dismissals); most often to right fast (36).
- Vulnerable early — get at them hard in their first 30 balls.

COMMON THEMES

- left-hand bat, averaging 29.6 at a strike rate of 47.5.
- Carries a big share of the batting — 13.8% of team runs.
- Scores mainly through the leg side (49%).

STRENGTHS

- Main scoring shot is the work/nudge (41% of runs).
- The **cut** brings them 13% of their runs vs pace — 1.7× the typical Test batter's share. Scores unusually little off the **pull/hook** vs pace (6% of runs vs 14% typically).

WEAKNESSES / HOW TO GET HIM

- **Get them early** — they're 2.2× more likely to fall in their first 30 balls (2.4 vs 1.1 dismissals/100 once set; false shot 16% vs 13%). Early runs come mainly off the work/nudge (50%).
- Most often out **caught** (69% of dismissals); most often to right fast (36).
- Struggles **in the channel** (20 avg, 2.3 outs/100).
- The ball that seams away hurts them (avg 18 vs 41 when it holds its line).
- The ball that swings in hurts them (avg 18 vs 44 when it holds its line).
- Most dangerous ball: **full in the channel** (5.8 dismissals/100, avg 11).
- His **pull/hook** is high-risk (false shot 35%, 0.0 outs/100).

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other LHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Scott Boland	Right pace	20.2	38.1	40.0	good length, 4th-stump channel	Caught behind 26.2%	High
Pat Cummins	Right pace	24.2	41.1	37.0	good length, 4th-stump channel	Caught behind 25.6%	High
Josh Hazlewood	Right pace	25.3	41.4	36.1	good length, 4th-stump channel	Caught behind 25.4%	High
Nathan Lyon	Off-spin	28.6	48.7	39.4	good length, outside off	Bowled 18.2%	High
Mitch Starc	Left pace	29.6	56.1	40.5	good length, 4th-stump channel	Caught behind 23.2%	High

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

*Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.*
