SUMMARY

- A modest, patient batter — strong vs short.
- Plan for pace: bowl **good length in the channel**, get it to **seams away**.
- Most often out **caught** (79% of dismissals); most often to right fast (24).

COMMON THEMES

- right-hand bat, averaging 21.4 at a strike rate of 42.3.
- Carries a big share of the batting — 11.1% of team runs.
- Scores mainly through the off side (44%).

STRENGTHS

- Main scoring shot is the work/nudge (42% of runs).
- The **cut** brings them 12% of their runs vs pace — 1.6× the typical Test batter's share. Scores unusually little off the **pull/hook** vs pace (4% of runs vs 14% typically).
- Starts securely — their dismissal rate barely drops once set (1.9 early vs 2.0/100); early pressure alone won't buy their wicket. Early runs come mainly off the work/nudge (47%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught** (79% of dismissals); most often to right fast (24).
- Vulnerable to the **good length** (averages 12 there vs 21 overall; 2.5 dismissals/100).
- Struggles **in the channel** (14 avg, 3.4 outs/100).
- The ball that seams away hurts them (avg 13 vs 38 when it holds its line).
- Most dangerous ball: **good length in the channel** (5.3 dismissals/100, avg 8).
- His **cut** is high-risk (false shot 35%, 2.2 outs/100).

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 4% of their runs where fine leg stands — the spare run-saver to move as the game asks.
