SUMMARY

- Plan for pace: bowl **good length outside off**, get it to **seams in / swings in**.
- They get out most to the **full outside off** (9.1 dismissals/100).
- Most often out **caught** (67% of dismissals); most often to right fast (11).

COMMON THEMES

- left-hand bat, averaging 31.5 at a strike rate of 68.1.
- Carries a big share of the batting — 11.9% of team runs.
- Scores mainly through the leg side (48%).

STRENGTHS

- Main scoring shot is the drive (47% of runs).
- The **slog** brings them 4% of their runs vs pace — 9.5× the typical Test batter's share. Scores unusually little off the **work/nudge** vs pace (21% of runs vs 37% typically).
- Starts securely — their dismissal rate barely drops once set (1.4 early vs 3.3/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (54%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught** (67% of dismissals); most often to right fast (11).
- Struggles **outside off** (13 avg, 3.9 outs/100).
- The ball that swings in hurts them (avg 16 vs 65 when it holds its line).
- Most dangerous ball: **full outside off** (9.1 dismissals/100, avg 9).

Match Impact (share of runs)

Makes **11.9%** of their team's runs over a career (typical innings 8.5%), and **3.1%** of all runs in their matches; carries the innings (≥25% of the team's runs) **25% of the time**, and dominates (≥40%) **7%**.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other LHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Scott Boland	Right pace	14.7	50.1	56.6	good length, 4th-stump channel	Caught behind 26.2%	High
Pat Cummins	Right pace	18.4	51.4	52.0	good length, 4th-stump channel	Caught behind 25.5%	Med
Josh Hazlewood	Right pace	21.1	52.4	47.9	good length, 4th-stump channel	Caught behind 26.7%	Med
Beau Webster	Off-spin	23.5	54.7	45.8	good length, 4th-stump channel	Caught behind 26.4%	Med
Mitch Starc	Left pace	27.6	59.0	44.2	good length, 4th-stump channel	Caught behind 23.4%	Cohort

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 2% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Bouncer plan

A standard bumper field — he isn't a heavy puller (P56), so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).

Fielder	Stock/Change	Why they're there
Slip 1	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull (1 of the 2 the Law allows).
Deep fine leg	Change	Deep behind square for the hook (2 of 2 — the leg-side limit).
