SUMMARY

- A solid, steady batter — strong vs spin, tight technique.
- Plan for spin: bowl **full in the channel**, get it to **turns in / drifts away**.
- They get out most to the **good length down the leg side** (2.4 dismissals/100).
- Most often out **caught** (68% of dismissals); most often to off spin (24).

COMMON THEMES

- left-hand bat, averaging 42.0 at a strike rate of 62.6.
- Carries a big share of the batting — 13.8% of team runs.
- Scores mainly through the off side (41%).

STRENGTHS

- Main scoring shot is the drive (26% of runs).
- The **pull/hook** brings them 8% of their runs vs spin — 2.1× the typical Test batter's share.
- Starts securely — their dismissal rate barely drops once set (1.4 early vs 1.5/100); early pressure alone won't buy their wicket. Early runs come mainly off the sweep (28%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught** (68% of dismissals); most often to off spin (24).
- Struggles **in the channel** (26 avg, 1.7 outs/100).
- The ball that turns in hurts them (avg 40 vs 78 when it holds its line).
- The ball that drifts away hurts them (avg 41 vs 63 when it holds its line).
- Most dangerous ball: **good length down the leg side** (2.4 dismissals/100, avg 24).
- His **sweep** is high-risk (false shot 26%, 3.8 outs/100).

Batting Fingerprint (percentile vs Test batters · spin traits)

A solid, steady batter — strong vs spin, tight technique.

Changing (last 3 years vs career): false % vs spin up.

Solid line = career, dotted = last 3 years (avg / SR / false% vs pace & spin). Percentile among Test batters (≥1500 balls). Red = a target (high vulnerability); green = a strength.

Match Impact (share of runs)

Makes 13.8% of their team's runs over a career (typical innings 7.7%), and 3.5% of all runs in their matches; carries the innings (≥25% of the team's runs) 16% of the time, and dominates (≥40%) 5%.

Breakdown by Type (within spin)

Bowler type	Average	Strike rate	False-shot %	Dismissals / 100	Balls
Spin	42.0	62.6	8.6%	1.49	2,950

Off Spin	34.7	57.9	10.2%	1.67	1,437
Left Orthodox	38.3	65.9	7.2%	1.72	988
Leg Break	89.7	64.0	8.6%	0.71	420
Left Unorthodox	—	89.5	0.0%	0.00	105

Start of Innings vs Set

Starts securely — their dismissal rate barely drops once set (1.4 early vs 1.5/100); early pressure alone won't buy their wicket. Early runs come mainly off the sweep (28%).

Phase	Average	Strike rate	False-shot %	Dismissals / 100	Boundary %	Balls
First 30 balls	42.5	58	10%	1.37	6%	877
Once set (31+)	41.8	64	8%	1.54	6%	2,073

v Zimbabwe · 1 Test · 111 balls · 73 runs · avg 36.5

They stuck to a good length at their pads. 2 dismissals — 2 caught, the wicket ball most often a good length, at the pads.

Ball	Them	Teammates	
A good length	77%	85%	▼ less

v Pakistan · 2 Tests · 418 balls · 196 runs · avg 49.0

They came round the wicket and stuck to a good length in the channel. 4 dismissals — 2 caught, 1 LBW and 1 bowled.

Ball	Them	Teammates	
Round the wicket	62%	49%	▲ more

v Ireland · 2 Tests · 378 balls · 232 runs · avg 77.3

Too few balls in this series to compare a plan.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other LHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Scott Boland	Right pace	20.2	38.1	40.0	good length, 4th-stump channel	Caught behind 26.2%	High
Pat Cummins	Right pace	24.2	41.1	37.0	good length, 4th-stump channel	Caught behind 25.6%	High
Josh Hazlewood	Right pace	25.3	41.4	36.1	good length, 4th-stump channel	Caught behind 25.4%	High
Nathan Lyon	Off-spin	28.6	48.7	39.4	good length, outside off	Bowled 18.2%	High
Mitch Starc	Left pace	29.6	56.1	40.5	good length, 4th-stump channel	Caught behind 23.2%	High

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (spin)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Turn movement

Turn movement	Avg	SR	False%	Outs/100	Bdry%	Balls
turns in	40.1	65	7%	1.61	6%	1,240
no turn	77.5	101	8%	1.30	12%	154
turns away	42.7	57	9%	1.34	6%	1,414

outside off	43.4	61	8%	1.40	6%	926
in the channel	25.8	45	7%	1.73	3%	521
on the stumps	43.6	59	8%	1.36	6%	884
down the leg side	77.0	84	12%	1.09	7%	184

DANGER BALL — WHERE THEY'RE MOST LIKELY OUT

▶ WATCH DANGER BALLS

Good length / down the leg side

2.4 dismissals per 100 · averages 24 here · 41 balls · false shot 13%

How They Score & Get Out

Scores most of their runs through the off side (41%; off 41% · leg 36% · straight 22%).

Shot types (risk) [▶ their sweep](#)

Shot	Avg	SR	False%	Outs/100	Bdry%	Balls
Sweep	37.3	143	26%	3.83	17%	183
Cut	44.3	100	20%	2.26	11%	133
Drive	58.2	91	7%	1.56	8%	320
Work/Nudge	53.6	44	7%	0.82	2%	608
Pull/Hook	91.0	228	5%	2.50	42%	40

Scoring mix vs the typical Test batter (vs spin)

The **pull/hook** brings them 8% of their runs vs spin — 2.1× the typical Test batter's share.

Shot	% of their runs	Typical	Index	Pctl
Drive	26%	30%	0.9×	P35
Work/Nudge	24%	27%	0.9×	P39
Sweep	23%	17%	1.4×	P65
Cut	12%	8%	1.5×	P77
Pull/Hook	8%	4%	2.1×	P80
Slog	5%	5%	1.0×	P51
Ramp/Scoop	0%	0%	—	P60

Share of stroke-coded runs vs spin; index = their share ÷ cohort median (153 Test batters). Highlight = signature shot; ▼ = scores unusually little there.

Most often out **caught** (68% of dismissals); most often to off spin (24). [▶ watch dismissals](#)

Dismissal mode	Count	%
Caught	30	68%
LBW	9	20%
Bowled	3	7%
Run Out	2	5%

Where they score — runs by area vs spin (mirrored for a left-hander).

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Field vs off spin

Early — first 30 balls · 492 balls

Fielder	Stock/Change	Why they're there
Slip 1	Stock	Standard stock position.
Silly point	Stock	Standard stock position.
Short leg	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Leg slip	Change	Actually caught at leg slip 2× vs this type — real evidence to post that catcher.
Midwicket	Stock	Standard stock position.
Deep square leg	Stock	Standard stock position.

Stock field + 1 change (highlighted).

Floating fielder: They score only 7% of their runs where cover stands — the spare run-saver to move as the game asks.

Floating fielder: Silly point sees few of their edges (0.2 vs 3.6 for the cordon) — float to backward point as needed.

Once set · 945 balls
