SUMMARY

- A solid, aggressive batter — no glaring weakness.
- Plan for spin: bowl **full in the channel**, get it to **drifts in**.
- They get out most to the **good length down the leg side** (2.9 dismissals/100).
- Most often out **caught** (43% of dismissals); most often to left orthodox (7).

COMMON THEMES

- left-hand bat, averaging 52.2 at a strike rate of 59.9.
- Carries a big share of the batting — 14.6% of team runs.
- Scores mainly through the off side (41%).

STRENGTHS

- Main scoring shot is the sweep (35% of runs).
- The **sweep** brings them 35% of their runs vs spin — 2.1× the typical Test batter's share. Scores unusually little off the **cut** vs spin (3% of runs vs 8% typically).
- Starts securely — their dismissal rate barely drops once set (0.9 early vs 1.3/100); early pressure alone won't buy their wicket. Early runs come mainly off the sweep (31%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught** (43% of dismissals); most often to left orthodox (7).
- Vulnerable to the **full** (averages 41 there vs 52 overall; 1.4 dismissals/100).
- Struggles **in the channel** (26 avg, 2.1 outs/100).
- The ball that drifts in hurts them (avg 49 vs 91 when it holds its line).
- Most dangerous ball: **good length down the leg side** (2.9 dismissals/100, avg 20).

Match Impact (share of runs)

Makes 14.6% of their team's runs over a career (typical innings 12.6%), and 3.9% of all runs in their matches; carries the innings (≥25% of the team's runs) 23% of the time.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Scott Boland	Right pace	16.0	45.8	52.5	good length, 4th-stump channel	Caught behind 26.2%	High
Pat Cummins	Right pace	17.9	46.9	48.6	good length, 4th-stump channel	Caught behind 28.3%	High
Josh Hazlewood	Right pace	22.1	47.1	43.5	good length, 4th-stump channel	Caught behind 26.2%	High
Brendan Doggett	Right pace	24.5	61.8	48.3	short, 4th-stump channel	Caught behind 29.6%	High
Beau Webster	Off-spin	25.8	48.8	39.6	good length, 4th-stump channel	Caught behind 27.4%	High

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.
