SUMMARY

- Plan for spin: bowl **full in the channel**.
- They get out most to the **full wide outside off** (6.7 dismissals/100).
- Most often out **caught** (43% of dismissals); most often to left orthodox (5).
- Vulnerable early — get at them hard in their first 30 balls.

COMMON THEMES

- left-hand bat, averaging 37.1 at a strike rate of 52.0.
- Carries a big share of the batting — 10.3% of team runs.
- Scores mainly through the V (50%).

STRENGTHS

- Main scoring shot is the work/nudge (30% of runs).
- The **pull/hook** brings them 9% of their runs vs spin — 2.2× the typical Test batter's share.

WEAKNESSES / HOW TO GET HIM

- Get them early** — they're 2.8× more likely to fall in their first 30 balls (2.5 vs 0.9 dismissals/100 once set; false shot 15% vs 9%). Early runs come mainly off the work/nudge (40%).
- Most often out **caught** (43% of dismissals); most often to left orthodox (5).
- Struggles **in the channel** (15 avg, 2.4 outs/100).
- Most dangerous ball: **full wide outside off** (6.7 dismissals/100, avg 11).

Match Impact (share of runs)

Makes **10.3%** of their team's runs over a career (typical innings 6.1%), and **2.4%** of all runs in their matches; carries the innings (≥25% of the team's runs) **15%** of the time, and dominates (≥40%) **8%**.

They came round the wicket and stuck to a good length in the channel. 4 dismissals — 2 caught, 1 bowled and 1 LBW, playing the forward defence.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Scott Boland	Right pace	15.5	42.5	51.4	good length, 4th-stump channel	Caught behind 26.9%	High
Pat Cummins	Right pace	19.1	44.8	46.2	good length, 4th-stump channel	Caught behind 26.1%	High
Josh Hazlewood	Right pace	21.7	43.4	41.3	good length, 4th-stump channel	Caught behind 25.8%	High
Beau Webster	Off-spin	23.1	43.9	39.2	good length, 4th-stump channel	Caught behind 27.1%	High
Mitch Starc	Left pace	27.6	59.0	44.2	good length, 4th-stump channel	Caught behind 23.4%	Cohort

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against off spin, so the orthodox field stands — that is the read.

Floating fielder: They score only 0% of their runs where mid-on stands — the spare run-saver to move as the game asks.

Floating fielder: Silly point sees few of their edges (0.1 vs 0.8 for the cordon) — float to backward point as needed.
