COMMON THEMES

- right-hand bat, averaging 36.6 at a strike rate of 60.6.
- Carries a big share of the batting — 14.7% of team runs.
- Scores mainly through the leg side (38%).

STRENGTHS

- Main scoring shot is the work/nudge (36% of runs).
- The **slog** brings them 5% of their runs — 1.6× the typical Test batter's share.
- Stronger against spin (46) than pace (31); pace — especially the quicks — is the more productive line of attack.
- Starts securely — their dismissal rate barely drops once set (1.6 early vs 1.7/100); early pressure alone won't buy their wicket. Early runs come mainly off the work/nudge (39%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught** (66% of dismissals); most often to right fast (41).
- Vulnerable to the **good length** (averages 25 there vs 37 overall; 1.8 dismissals/100).
- Struggles **outside off** (20 avg, 2.2 outs/100).
- The ball that seams in hurts them (avg 13 vs 45 when it holds its line).
- Most dangerous ball: **full outside off** (3.7 dismissals/100, avg 15).
- His **cut** is high-risk (false shot 26%, 4.4 outs/100).

Match Impact (share of runs)

Makes **14.7%** of their team's runs over a career (typical innings 11.9%), and **3.8%** of all runs in their matches; carries the innings (≥25% of the team's runs) **18%** of the time, and dominates (≥40%) 6%.

Against Each Bowler Type

Stronger against spin (46) than pace (31); pace — especially the quicks — is the more productive line of attack.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Short-ball plan

Fielder	Stock/Change	Why they're there
Slip 1	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.

Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull (1 of the 2 the Law allows).
Deep fine leg	Change	Deep behind square for the hook (2 of 2 — the leg-side limit).

He's a heavy puller/hooker (P90 of his runs vs pace) — the bumper plan: one slip kept, a catcher in front of square, and both riders behind square (deep backward square + deep fine leg, the two the leg-side Law allows).
