COMMON THEMES

- right-hand bat, averaging 25.5 at a strike rate of 51.9.
- Carries a big share of the batting — 9.6% of team runs.
- Scores mainly through the off side (46%).

STRENGTHS

- Main scoring shot is the drive (39% of runs).
- The **cut** brings them 11% of their runs — 1.4× the typical Test batter's share.
- Stronger against spin (31) than pace (21); pace — especially the quicks — is the more productive line of attack.
- Starts securely — their dismissal rate barely drops once set (1.9 early vs 2.2/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (38%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught** (72% of dismissals); most often to right fast (30).
- Vulnerable to the **good length** (averages 18 there vs 26 overall; 2.3 dismissals/100).
- Struggles **in the channel** (14 avg, 2.8 outs/100).
- Most dangerous ball: **back of a length wide outside off** (4.2 dismissals/100, avg 18).
- His **pull/hook** is high-risk (false shot 43%, 2.2 outs/100).

Batting Fingerprint (percentile vs Test batters)

Percentile among Test batters (≥ 1500 balls). Red = a target (high vulnerability); green = a strength. Grey line = this batter in the peer spread.

Match Impact (share of runs)

Makes **9.6%** of their team's runs over a career (typical innings 7.1%), and **2.5%** of all runs in their matches; carries the innings (≥25% of the team's runs) 8% of the time.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.
