COMMON THEMES

- left-hand bat, averaging 28.5 at a strike rate of 49.9.
- Carries a big share of the batting — 11.4% of team runs.
- Scores mainly through the leg side (47%).

STRENGTHS

- Main scoring shot is the work/nudge (34% of runs).
- The **cut** brings them 16% of their runs — 1.9× the typical Test batter's share. Scores unusually little off the **sweep** (1% of runs vs 7% typically).
- Stronger against spin (36) than pace (26); pace — especially the quicks — is the more productive line of attack.

WEAKNESSES / HOW TO GET HIM

- Somewhat more vulnerable early (1.9 vs 1.7 dismissals/100 once set). Early runs come mainly off the work/nudge (42%).
- Most often out **caught** (65% of dismissals); most often to right fast (26).
- Vulnerable to the **full** (averages 20 there vs 28 overall; 3.1 dismissals/100).
- Struggles **outside off** (18 avg, 2.2 outs/100).
- The ball that seams away hurts them (avg 16 vs 39 when it holds its line).
- Most dangerous ball: **full in the channel** (3.7 dismissals/100, avg 16).
- His **pull/hook** is high-risk (false shot 35%, 0.0 outs/100).

Match Impact (share of runs)

Makes 11.4% of their team's runs over a career (typical innings 7.6%), and 2.9% of all runs in their matches; carries the innings (≥25% of the team's runs) 15% of the time, and dominates (≥40%) 4%.

Against Each Bowler Type

Stronger against spin (36) than pace (26); pace — especially the quicks — is the more productive line of attack.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Scott Boland	Right pace	14.9	41.1	51.5	good length, 4th-stump channel	Caught behind 27.2%	High
Pat Cummins	Right pace	18.7	44.2	46.9	good length, 4th-stump channel	Caught behind 26.5%	High
Josh Hazlewood	Right pace	19.9	42.7	43.5	good length, 4th-stump channel	Caught behind 27.0%	High
Beau Webster	Off-spin	20.7	41.2	42.1	good length, 4th-stump channel	Caught behind 27.1%	High
Nathan Lyon	Off-spin	25.4	43.6	40.7	good length, outside off	LBW 19.3%	High

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.
