COMMON THEMES

- left-hand bat, averaging 29.4 at a strike rate of 61.1.
- Carries a big share of the batting — 11.9% of team runs.
- Scores mainly through the leg side (41%).

STRENGTHS

- Main scoring shot is the drive (39% of runs).
- The **slog** brings them 7% of their runs — 2.2× the typical Test batter's share.
- Handles both similarly (pace 32, spin 28).
- Starts securely — their dismissal rate barely drops once set (1.7 early vs 2.4/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (46%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught** (78% of dismissals); most often to right fast (11).
- Struggles **outside off** (13 avg, 3.9 outs/100).
- The ball that swings in hurts them (avg 16 vs 65 when it holds its line).
- Most dangerous ball: **full outside off** (9.1 dismissals/100, avg 9).

Match Impact (share of runs)

Makes **11.9%** of their team's runs over a career (typical innings 8.5%), and **3.1%** of all runs in their matches; carries the innings (≥25% of the team's runs) **25% of the time, and dominates (≥40%) 7%.**

Against Each Bowler Type

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Scott Boland	Right pace	14.7	50.1	56.6	good length, 4th-stump channel	Caught behind 26.2%	High
Pat Cummins	Right pace	18.4	51.4	52.0	good length, 4th-stump channel	Caught behind 25.5%	Med
Josh Hazlewood	Right pace	21.1	52.4	47.9	good length, 4th-stump channel	Caught behind 26.7%	Med
Beau Webster	Off-spin	23.5	54.7	45.8	good length, 4th-stump channel	Caught behind 26.4%	Med
Mitch Starc	Left pace	27.6	59.0	44.2	good length, 4th-stump channel	Caught behind 23.4%	Cohort

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.
