COMMON THEMES

- left-hand bat, averaging 24.7 at a strike rate of 49.3.
- Carries a big share of the batting — 10.3% of team runs.
- Scores mainly through the V (37%).

STRENGTHS

- Main scoring shot is the work/nudge (36% of runs).
- The **cut** brings them 16% of their runs — 1.9× the typical Test batter's share.
- Stronger against spin (37) than pace (20); pace — especially the quicks — is the more productive line of attack.
- Starts securely — their dismissal rate barely drops once set (1.9 early vs 2.0/100); early pressure alone won't buy their wicket. Early runs come mainly off the work/nudge (43%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught** (58% of dismissals); most often to right fast (10).
- Vulnerable to the **good length** (averages 14 there vs 25 overall; 2.4 dismissals/100).
- Struggles **outside off** (13 avg, 2.9 outs/100).
- The ball that seams in hurts them (avg 12 vs 47 when it holds its line).
- Most dangerous ball: **full outside off** (4.5 dismissals/100, avg 10).

Match Impact (share of runs)

Makes **10.3%** of their team's runs over a career (typical innings 6.1%), and **2.4%** of all runs in their matches; carries the innings (≥25% of the team's runs) **15% of the time**, and dominates (≥40%) 8%.

Against Each Bowler Type

Stronger against spin (37) than pace (20); pace — especially the quicks — is the more productive line of attack.

Bowler type	Average	Strike rate	False-shot %	Dismissals / 100	Balls

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Scott Boland	Right pace	15.5	42.5	51.4	good length, 4th-stump channel	Caught behind 26.9%	High
Pat Cummins	Right pace	19.1	44.8	46.2	good length, 4th-stump channel	Caught behind 26.1%	High
Josh Hazlewood	Right pace	21.7	43.4	41.3	good length, 4th-stump channel	Caught behind 25.8%	High
Beau Webster	Off-spin	23.1	43.9	39.2	good length, 4th-stump channel	Caught behind 27.1%	High
Mitch Starc	Left pace	27.6	59.0	44.2	good length, 4th-stump channel	Caught behind 23.4%	Cohort

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.
